MODULAR
PEER REVIEW

Today

1. Welcome & Reminders
2. Review purposes Exercise
   a. Share Back
3. Dot Voting to guide smaller groups
4. Next steps

Reminders

1. Join the Google Group to Connect with Colleagues
2. Code of Conduct & How we are working together
3. Summary and outputs published
4. Form to credit your contributions

Purpose of Reviews

Modular review requires clarity about what review is trying to accomplish.

Our goal today:

1. Attempting the “why” by focusing on the “what”
2. Test which modular components fit different review purposes
3. Generate signal, not perfect answers. Full definitions will come later
4. Avoid the “Terminology Trap”

Working List of Review Purposes:

1. Improvement & Iteration
2. Validity & Integrity
3. Risk & Responsibility
4. Decision & Resource Allocation
5. Recognition & Credit
6. Interoperability & Standards Alignment
7. Knowledge Exchange & Sense-Making

These are scaffolding, not final answers.

Breakout Instructions

Together you have 30 minutes in Miro to:

1. Look at the 7 buckets of purposes
2. Use the reviewable objects or component list
3. **Sort by fit:**
   a. Move those objects into the bucket that best describes why that specific component is being reviewed.
4. **Duplication is allowed and expected**
5. Add short notes about assumptions you're making or signals about how you're interpreting the purpose.

Breakout Instructions

BREAKOUT ROOM 1

Sticky stack

Dot voting

Improvement & Iteration

Modular review components:

Example: Study design

Signals & definition notes:

- example: early stages

Validity & Integrity

Share Back Instructions

Nominate a speaker to share the following in 90 seconds

1. What objects or components crossed many purposes?
2. What surprised your group?
3. Did any placement shift your thinking?

Dot voting

Looking at the compiled list of review objects:

You have
3 dots

Vote for the objects this group **should examine in deeper detail**

Complete voting by March 3, 2026 use the [Miro Board]

Next Meeting

March 17

Between now and next session:

- We'll synthesize today's patterns
- Share heat map results
- Propose 3–5 focus areas
- Begin forming subgroups
