

MODULAR PEER REVIEW

WORKING GROUP

MARCH 17, 2026

Today

1. Welcome
2. Dot Voting Results
3. Ideate Questions
 - a. Share Back
4. Homework & Next steps

Reminders

1. [Join the Google Group](#) to Connect with Colleagues
2. [Code of Conduct](#) & How we are working together
3. [Summary](#) and outputs published
4. [Form to credit your contributions](#)

Dot Voting & Sub-Group Creation

1. Preregistration

- (including study design and study power analysis)

2. Data

- (Look at full research lifecycle)

3. Code & Notebooks

- (including workflow)

4. Funding & Grant Proposals

- (including funding plans)

5. Figures & visualizations

Reflection: Best ever!

“Think about the best review or feedback on you’ve received on your work.”

What made that review useful? Think about:

1. What information did the reviewer have or not?
2. What makes feedback constructive rather than obstructive?
3. What signals quality when reviewing something new?
4. What helps reviewers give feedback early in a project?

Menti Poll

Breakout Instructions

Together you have 20 minutes ideate the following:

STEP 1: **Brainstorm needs or conditions need to be met to make a review successful.**

STEP 2: **Brainstorm questions a reviewer might ask when reviewing this object.**

Share Back Instructions

Nominate a speaker to share on of the following in 90 seconds

- 1. 1–2 key review questions they think are essential.**
- 2. Surprise that came up in discussion.**
- 3. What does your group still want to figure out.**

Next Meeting

APRIL 21

Between now and next session:

- Homework answer the four homework questions in your groups document.
- Completed by April 3, 2026

Homework Questions:

- 1. What questions felt universal across research objects?**
 - What showed up regardless of object type?
- 2. What questions felt unique to your object?**
 - What makes reviewing this object different?
- 3. What information would a reviewer need to answer these questions?**
 - Is there documentation, metadata, or context required?
- 4. What might make reviewing this object difficult?**
 - Where could modular review break down?
