

MODULAR PEER REVIEW

WORKING GROUP

May 19, 2026

PREVIEW

CSF

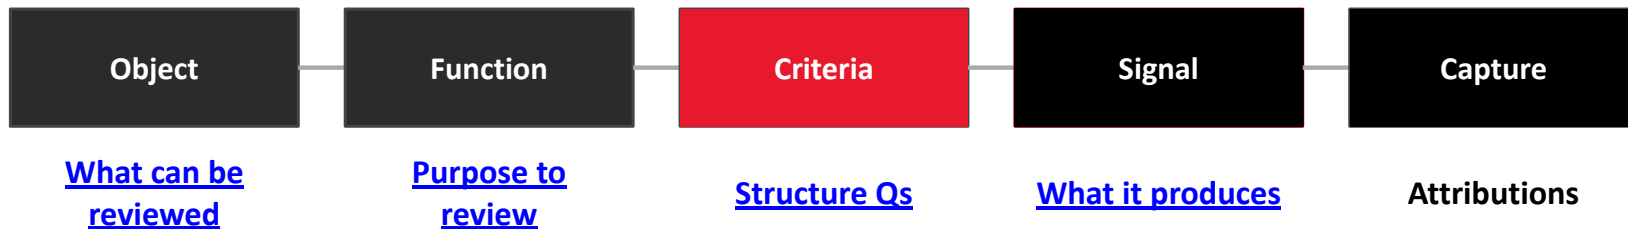

Today

1. Welcome & Framing
2. Updates to the Modular Peer Review System Map
3. Run a live example through the system
4. Focus on the questions needed for purpose and signals
5. Share back and last session

Modular Review System Map : Refined

Validate whether your review structure produces meaningful trust signals. We are testing:

1. Are we asking the right questions? | 2. Do the questions generate useful signals?

Modular Review System Map : Refined

Signal strength:

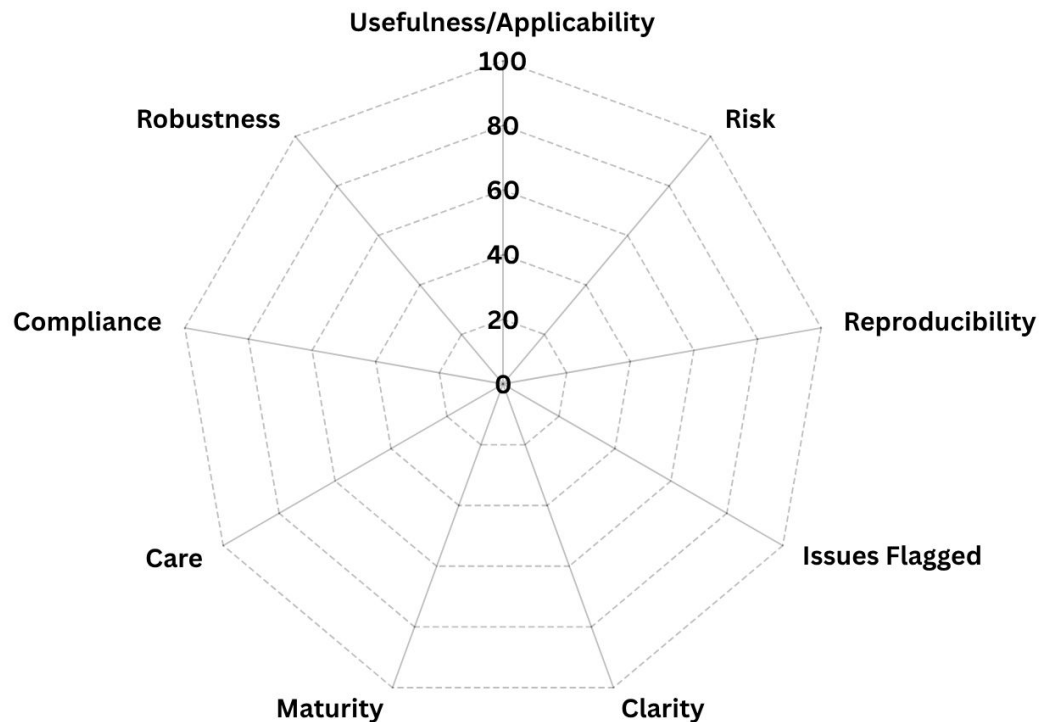

Very Low (0-20)

Low (21-40)

Moderate (41-60)

Strong (61-80)

Very Strong (81-100)

Working Group: Exercise 25–30 Mins

Your Goal

Testing the Modular Review Arc to understand if it works across object types?

STEP 1: Ground yourself in your object

- Get acquainted with your test object
- Review your questions from Session 3

STEP 2: [Run a live review and complete the worksheet.](#)

- Cover as much ground as possible and complete your signal spider map

STEP 3: Share back

- Tell us how the review went. What worked and didn't.

Share Back Instructions

Nominate a speaker — each group has 2–3 minutes.

1. What went smooth? What was sticky?
2. Did your question change during the review to surface signals and complete the spider map?

Next Meeting

June 16

Our last session together to celebrate the work we did together and close any loose ends.
